WEATHER KEY POINTS

05/21/19 - 05/27/19

Monday-Sunday

- Windy conditions continue today across inland southern CA with gusts of 45 to 60 mph expected
 - Areas from San Luis Obispo County south to LA County and areas inland will see gusts to 45 mph/
 - Strong winds will persist across the western Mojave Desert early this morning then potentially damaging winds (up to 60 mph) are expected to develop late this morning through this evening before gradually decreasing.
 - High winds can blow down small outbuildings and break limbs. Blowing dust may reducing visibility. Isolated power outages could be possible.
- The active weather pattern continues especially across the northern half of the state
 - The northern coast will receive another 1-2" of rain over the next few days, most falling Tuesday (today).
 - The debris flow threat on burn scars is very low. Debris flows are not likely.
- By the end of the week, weather systems moving through will bring snow to only the highest peaks of the Sierras as temperatures gradually warm.
